# NGEAP Myths

- **Myth:** Some students are receiving extensive amounts of monies from military education programs for college
- **Truth:** There are multiple military education programs available to our service members, of which we encourage full participation. However, any combination of these programs will not exceed the established Cost of Attendance levels.
- **Myth:** The NGEAP funds received by students is equal to the percent of the average Regent rate, set by the Adjutant General.
- **Truth:**
  - Average award (annual) at Community College is 44% of maximum award;
  - Average award (annual) at Regent is 96% of maximum award;
  - Average award (annual) at Private institutions is 72% of maximum award.

# **Future considerations**

- Changing deadline dates in order to get actual application numbers. 1July and 1December.
- Consideration of modifications to applications requirements
- Complete review of potential programmatic changes over next year

**Thank you**
